# Features

---

## Ergo Metal

Steel structure that minimizes the use of plastic parts.

## The secure transaction system

The photocell and the sensor of the issued product provide the proper purchase process.

## Max Protect

3-point closing mechanism.

## Termo Box

Efficient, quiet and economic unit which cools down the chamber with products to temperatures ranging from + 5°C up to + 20°C.

## Coin slot

Safe and ergonomic coin slot.

## Numeric keypad

Vandal-resistant numeric keypad made of stainless steel.

## All types of payment

Universal software of the machine enables the installation of payment devices, such as: coin acceptor, banknote acceptor, magnetic or chip card reader.

## LCD

Legible alphanumeric LCD information display.

## LED

Energy-efficient LED interior lighting.

# Accessories

---

## Clear information

In order to improve the functionality of the machine, we equip the machines' drawers with numeric displays, which inform the customer about the price and product number. In addition, displays can be operated online.

## Manage online

Event Real Time Information - ERTI is a modern technology that allows operator to effectively manage the vending machine.

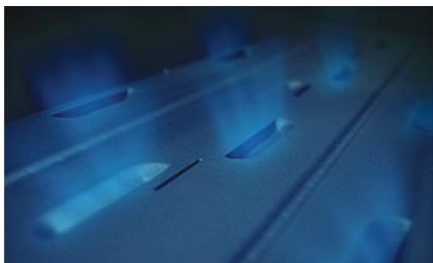

## Fragrance system

The vending machine is a self-service shop that not only sells but can also encourage consumers to purchase a product. Try a natural marketing tool - Aromavending system, which will initiate the purchase of products from the machine.

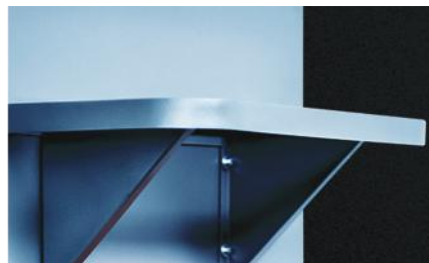

## The marketing effect

The marketing effect is a set of colorful lights and voice boxes that are designed to encourage a consumer to purchase a product. Draw attention of passers-by with the help of the talking machine.

## The air circulation

All models of Evend machines provide freshness of the stocked products through the appropriate circulation of cool air.

## Metal accessories

We care about the surrounding of the machines and we increase their functionality. Each device can be equipped with elegant metal accessories that will turn the machine into a place for a quick break. We offer cabinets, shelves, tables and waste bins.

## Payment systems

Our devices cooperate with all leading and well-known controllers, working in the MDB communication protocol, such as: coin validators, banknote acceptors and non-cash payment readers.

## Issuing element

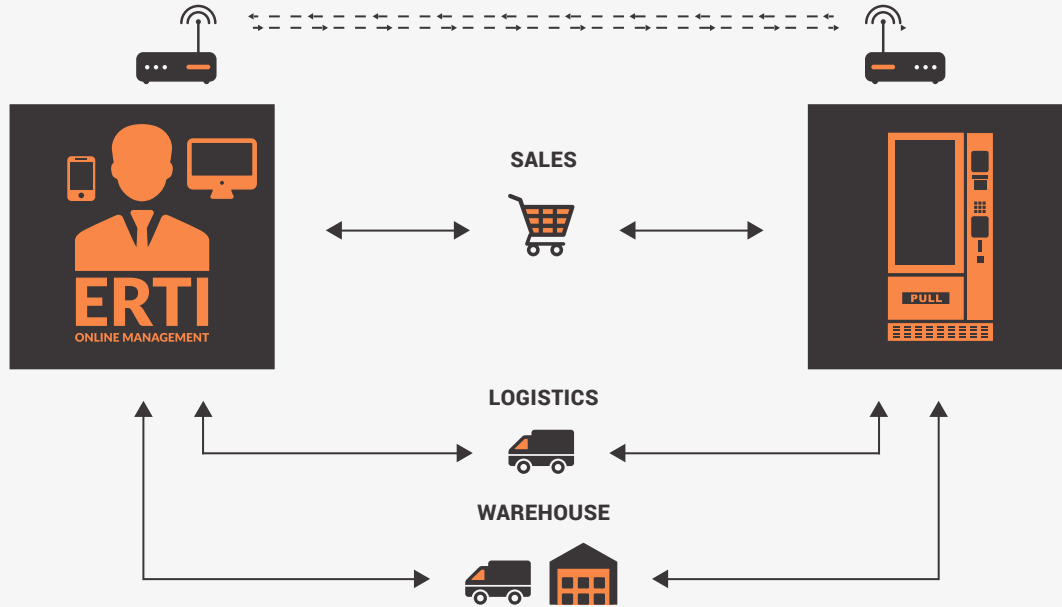

We will adjust the appropriate spring for the individual range of the customer's products.

## Individual design

The appearance of the machine can be a representative sign of your company.

# ERTI

## Event Real Time Information

ERTI- is a modern technology which allows operators to efficiently manage the vending machine.

Event continues to develop ERTI and in the near future is planning to implement new solutions which will enable every operator to work efficiently.

## This ERTI system allows operators to:

- Introduce remote changes of certain system settings (eg. price changes, discounts, etc.);
- Immediate notification of faults or products shortage in the machine;
- Reading and report about sales volume;
- Meticulously manage the storehouse;
- Keep records of machines – machines groups and their location;
- Sale from a vending machine using the cashless system.
